SPECIMEN STOCK

AZALEAS (Hardy Evergreen Varieties)

Our Azaleas are exceptionally bushy, heavily budded, well-rounded plants which have been properly pinched back to insure full heads. When considering sizes, please do not confuse our measurements with straggly, shapeless plants which may have a large so-called spread, but are not at all bushy.

FRENCH HYBRID LILACS

All our Lilacs are root-grafted, planted deep and are all on their own root. Our stock is often pruned back to insure heavy plants. Our 12-15 inch size (4-15 branches) will make excellent material to grow on in pots for forcing purposes. Through our method of culture, suckers are practically eliminated.

For varieties, see list of lining-out stock.
